### Instrument Details

Specifications	1				
Measurement	Reflectivity, mean Doppler velocity, Doppler spectrum width, Doppler spectra				
Derived Parameter(s)	Cloud boundaries, phase, microphysics, cloud-scale dynamics				
Serial #	In-house build; no serial #				
Instrument Manufacturer	In-house build; NOAA ETL (PSD)				
Type	Doppler 35-GHz Millimeter Cloud Radar				
Location	Instrument inside the MSF, antenna on top of the MSF				
Calibration factors	Full internal system calibration once a month with calibration checks done daily. The external calibration of the antenna was performed at an antenna range many years ago and is taken to be constant. There is a complete internal calibration that is already applied to the data stream				
Modes	ST	CI	GE	PR
