Chris,

please find the final version (v3) of the VISSS manual attached. Changes are minor in comparison to v2 which is in the container. I also attached manuals for the camera itself and backlight, you shouldn't need them but maybe bring them just in case. I will provide you also printed copies of the VISSS manual.

Have a good & save trip! I hope you can send me 1 or 2 nice pictures how my instruments looks in the field!

Max
