Installation of iPort

- 1. Double click on the executable icon
- 2. Continue to install iPort
 - a. Note: If iPort has already been installed on the computer you are using and you are now re-intalling iPort, you must first un-install the iPort that is currently on the computer before continuing with the installation of the "new" iPort software
- 3. Once installed, open iPort
- 4. On the menu bar, click Comm \rightarrow Connect

7. Continue with Calibration and Data Download

Troubleshooting Notes

Issue: If the instrument is not connecting

1. The instrument MUST be connected to a laptop with a NULL cable, not a straight serial cable.

2. Try restarting the laptop, with the instrument still on.

3. Try other COM ports.
